SUMMARY

Cloud Engineer with 4 years experience designing, deploying, and managing scalable, secure, cost-optimized cloud infrastructures on Azure and AWS. Skilled in hybrid and multi-cloud environments, leveraging AKS, VMs, Blob Storage, EC2, S3, RDS, Lambda, and VPC/VNet networking. Proficient in Infrastructure as Code (Terraform, ARM templates, CloudFormation) and CI/CD automation using Azure DevOps, Jenkins, GitHub Actions, GitOps workflows. Experienced in cloud migration, containerized microservices, monitoring, cost optimization, and security compliance (HIPAA, PCI DSS, SOC 2) to deliver reliable, high-performance enterprise solutions.

SKILLS

Cloud Platforms & Services: AWS (EC2, S3, RDS, Lambda, VPC, ELB/ALB, Auto Scaling, CloudWatch, IAM, KMS, CloudFormation, EKS), Azure (VMs, Blob Storage, Virtual Network, NSG, AKS, Azure Monitor, Application Insights, Key Vault, Functions, Logic Apps)

Infrastructure as Code (IaC): Terraform, CloudFormation, ARM Templates, environment drift detection

Containers & Orchestration: Docker, Kubernetes (AKS/EKS), Helm

Monitoring & Observability: CloudWatch, Azure Monitor, Log Analytics, Application Insights, Prometheus, Grafana

CI/CD & Automation: Jenkins, Azure DevOps, GitHub Actions, GitOps concepts, Python, Bash, PowerShell

Security & Compliance: IAM, RBAC, KMS/Key Vault Encryption, HIPAA, PCI DSS, SOC 2, DevSecOps best practices

Databases & Storage: SQL, RDS, DynamoDB, Azure Blob Storage, S3

Networking & Architecture: VPC/VNet design, Subnetting, NAT Gateways, Load Balancers, Hybrid Cloud Integration, Disaster Recovery

Cost & Performance Optimization: Auto-scaling, Reserved/Spot Instances, Performance Tuning, FinOps Awareness

WORK EXPERIENCE

CVS Health, Woonsocket, Rhode Island, Hybrid

May 2025 – present

Cloud Engineer

- Engineered and optimized secure Azure-based healthcare infrastructure using VNets, subnets, NSGs, RBAC, and Azure Key Vault, improving application uptime by 28% and ensuring HIPAA, PCI DSS, and SOC 2 compliance.
- Automated infrastructure provisioning and deployment using Terraform, ARM templates, and Azure DevOps pipelines, reducing environment setup time by 70% and ensuring consistent deployments across dev, QA, and production.
- Implemented monitoring, logging, and alerting with Azure Monitor, Log Analytics, Application Insights, and Azure Sentinel, detecting and resolving 100+ performance and security incidents monthly, improving incident response by 40%.
- Optimized cloud costs by right-sizing VMs, leveraging Azure Reserved Instances, auto-scaling, and spot VMs, saving \$13,000 monthly while maintaining high availability for critical healthcare workloads.
- Designed and deployed containerized microservices using AKS and Docker, integrated with Azure DevOps CI/CD pipelines, reducing release cycles from 10 days to 6.4 days while ensuring zero downtime deployments.
- Oversaw hybrid cloud migration and multi-region data integration, transferring 1.2TB of sensitive healthcare data from on-premises to Azure Blob Storage with encryption, redundancy, automated backup, and disaster recovery policies.

Infosys, Hyderabad, India

Oct 2020 – Jan 2024

Cloud Engineer

- Led cloud cost optimization for high-frequency financial and trading platforms using AWS Cost Explorer, Savings Plans, and rightsizing strategies, reducing annual cloud spend by \$70K.
- Architected highly available, PCI DSS and SOC 2-aligned AWS infrastructure across multi-AZ VPCs with subnets, NAT gateways, and transit gateways, improving uptime and reducing disruptions.
- Migrated on-premises applications and databases to AWS using S3, EBS snapshots, and Database Migration Service with encryption and replication, reducing batch processing times by 30% while ensuring regulatory compliance.
- Constructed containerized microservices using Docker and Amazon EKS with Horizontal Pod Autoscaling and ALB ingress controllers, reducing latency by 35% and supporting increased transaction volumes.
- Streamlined event-driven workflows using AWS Lambda, Step Functions, and EventBridge for settlements, fraud alerts, and notifications, reducing T+1 processing to under 2 hours.
- Built and optimized CI/CD pipelines with CodePipeline, CodeBuild, and CodeDeploy using blue-green and rolling deployments, reducing release failures by 45% and accelerating feature rollout.
- Strengthened cloud security and observability with IAM least-privilege policies, KMS key rotation, CloudTrail, CloudWatch monitoring, and AWS Config rules, achieving 100% audit readiness.

CERTIFICATIONS

- AWS Cloud Practitioner
- Google Associate Cloud Engineer (ACE)

EDUCATION

Master of Science in Information Technology

Clark University, Worcester, MA

- Coursework:** Cloud Computing, Data mining with Splunk, Information System Analysis and Design, Network Architecture and Design, Cyber Security, Intro Incident Resp/Digital FO, Data management for information Technology, Industry/Creative app Gen AI.
